SCOPE OF ACCREDITATION INSPECTIONS (EBAA Medical Standards, November 2008)

A1.000 Introduction and Purpose

These standards have been developed to assure consistently acceptable levels of quality, proficiency, and ethics in dealing with eye tissue for transplantation and define the minimum standards of practice in the recovery, preservation, storage, and distribution of eye tissue for transplantation and research, as determined by the ophthalmological medical community.

A1.100 Scope

These standards are intended to apply to any and all aspects of eye banking, to include:

- Recovery of eye and corneal tissue
- Processing of tissue
- Storage of tissue
- Evaluation of tissue
- Determination of donor eligibility
- Distribution of tissue for transplant, research and teaching

These standards shall be reviewed at least annually and revised as necessary to incorporate current research findings and improved clinical practice.

This list represents information on file regarding the accreditation status of eye banks as of December 2009. The eye banks are listed in alphabetical order by state and categorized by their accreditation designation. If a bank is non-accredited (Denied), it is listed as such with the date of denial. For further information, contact the EBAA office at 202-775-4999.

Eye Bank Association of America's Accreditation Status List

Current as of December 2009 – Public

Page 5 of 9

B1.000 Active Membership

In order for an eye bank to become an active member of the Eye Bank Association of America (EBAA), it must comply with the EBAA Bylaws and the following:

1. Demonstrate compliance with EBAA Medical Standards.
2. Maintain accreditation status by passing the site inspection as administered by the EBAA Accreditation Board.
3. Demonstrate proficiency in any aspect of eye banking including recovery, processing, tissue storage, evaluation, donor eligibility determination and final distribution.
4. Proficiency shall be demonstrated by providing documentation, at the time of completing the application, of the handling of at least 25 surgical corneas annually.
5. Certify compliance with applicable Federal and State regulations.

Once accredited, an eye bank must be inspected and reaccredited at least every three years to maintain active membership in the EBAA.

EYE BANK FUNCTIONS (EBAA Accreditation Policies and Procedures, December 2008)

Eye Bank Establishment Functions

***The EBAA Accreditation Board accredits establishments that perform any or all of the following functions:**

Recovery (R): The establishment procures ocular tissues, which encompasses, but is not limited to: in situ excision, whole globe enucleation, donor body assessment, pen light examination, assignment of a unique identification number, preservation media storage, pre-distribution packaging of tissue, supply storage, sterilization of instruments.

Processing (P): Post-recovery, the establishment prepares ocular tissues, which encompasses, but is not limited to: open container processing (e.g. laboratory corneal excisions, laboratory scleral preservation, preparation of lamellar tissue, preparation of tissue for IEK), supply storage, sterilization of instruments, environmental control/cleaning, preservation media storage, pre-distribution packaging of tissue.

Tissue Storage (S): The establishment stores transplantable ocular tissue, which encompasses, but is not limited to: Refrigerator control (temperature monitoring), quarantine requirements, and others, as appropriate to the scope of the inspection.

Final Distribution (FD): The facility releases the tissue for distribution to the end user, which encompasses, but is not limited to: handling of recipient records, packaging tissue for distribution, labeling tissue, seeking post-operative follow-up reports, tracking of the tissue, assignment of a unique identification number.

Tissue Evaluation (TE): The establishment performs slit lamp microscopy and/or specular microscopy of ocular tissue, which encompasses, but is not limited to: determination of endothelial density, equipment calibration and maintenance.

Donor Eligibility Determination (DE): The establishment makes the final determination of donor suitability, which encompasses, but is not limited to: signing off on donor screening and testing, including the review of donor physical assessment, medical/ social history, plasma dilution, serology results.

This list represents information on file regarding the accreditation status of eye banks as of December 2009. The eye banks are listed in alphabetical order by state and categorized by their accreditation designation. If a bank is non-accredited (Denied), it is listed as such with the date of denial. For further information, contact the EBAA office at 202-775-4999.

CATEGORIES OF ACCREDITATION (EBAA Bylaws, June 2009)

ARTICLE 2 - MEMBERSHIP

2.1 Categories of Membership

A. Active (Accredited) Comprehensive U.S. Membership.

An eye bank (or group of eye banks organized and operated as a single legal entity) is eligible for Active U.S. Membership if it (or in the case of a group, each of its members): (1) is organized under the laws of a state of the United States and is an organization exempt from federal taxation under Sections 501(c)(3), 501(c)(4) or 501(c)(6) of the Internal Revenue Code, or another provision deemed analogous by the Association; (2) provides evidence satisfactory to the Association that it has substantial support among the medical and ophthalmological communities; (3) has successfully completed the Association's accreditation process; (4) is not currently suspended or terminated from Association membership as the result of a finding of unethical conduct under the Association's Code of Ethics; and (5) pays the required dues.

B. Active (Accredited) Limited U.S. Membership.

An eye bank (or entity(ies) performing limited eye bank activities or a group of eye banks) which performs a limited number of eye banking activities is eligible for Active (Accredited) Limited U.S. Membership if it: (1) is organized under the laws of a state of the United States and is an organization exempt from federal taxation under Sections 501(c)(3), 501(c)(4) or 501(c)(6) of the Internal Revenue Code, or another provision deemed analogous by the Association; (2) provides evidence satisfactory to the Association that it has substantial support among the medical and ophthalmological communities; (3) has successfully completed the Association's accreditation process for those eye banking activities it performs; (4) is not currently suspended or terminated from Association membership as the result of a finding of unethical conduct under the Association's Code of Ethics; and (5) pays the required dues.

C. Associate (Unaccredited) U.S. Membership.

An eye bank (or entity(ies) performing eye bank activities or a group of eye banks) is eligible for Associate (Unaccredited) U.S. Membership if it meets all the requirements for Active (Accredited) Comprehensive or, alternatively, Active (Accredited) Limited U.S. Membership except that it has not yet met or does not currently meet the Association's requirements for accreditation.

D. Active (Accredited) Comprehensive International Membership.

An eye bank (or entity(ies) located outside the United States is eligible for Active (Accredited) Comprehensive International Membership if it meets the requirements substantially equivalent to those for Active (Accredited) Comprehensive U.S. Membership, except that it is organized as a charitable, educational or social welfare organization under applicable law of a foreign nation or political subdivision thereof.

E. Active (Accredited) Limited International Membership.

An eye bank (or entity(ies) performing eye bank activities or a group of eye banks) located outside the United States is eligible for Active (Accredited) Limited International Membership if it meets the requirements substantially equivalent to those for Active (Accredited) Limited U.S. Membership, except that it is organized as a charitable, educational or social welfare organization under applicable law of a foreign nation or political subdivision thereof.

F. Associate (Unaccredited) International Membership.

An eye bank (or entity(ies) performing eye bank activities) located outside the United States is eligible for Associate (Unaccredited) International Membership if it meets all the criteria for Active (Accredited) Comprehensive or, alternatively, Active (Accredited) Limited International Membership except that it has not yet met or does not currently meet the Association's requirements for accreditation.

GUIDELINES FOR ACCREDITATION DECISIONS (EBAA Accreditation Policies and Procedures, December 2008)

D1.000 Accreditation Results

- a. Results of the site visit are determined by a majority decision of the Accreditation Board following a thorough review of the information and materials submitted by the eye bank and the inspection team.

D1.300 Accreditation Decisions

Accreditation decisions take effect upon official notification of Board decisions (or others as defined by these Policies and Procedures), provided either at an EBAA meeting or through the mail, even when subsequent corrective actions are required. Failure to provide documentation of the implementation of corrective actions to the Board's satisfaction, within the required time frames, may result in loss of accreditation status.

D1.310 Accreditation Status

- a. Accreditation is awarded on a time-limited basis by vote of the Accreditation Board. An eye bank that receives no citations following inspection will be recommended to receive maximum accreditation status by motion and approval of the Accreditation Board. The following guidelines are used by the Board:
 - **Three Year** - Acceptable compliance with EBAA Medical Standards in all performance areas related to accreditation designation (i.e., pre-inspection questionnaire, policies and procedures, executive director, medical director, technical personnel and procedures, lab and equipment, records) demonstrated during the site inspection and upon initial review of the policies and procedures. An overall score of at least 95% was achieved and at least 85% in all performance areas. Follow-up/corrective actions required were minor, did not involve potential threats to recipient or employee safety and could be completed within one month following official written notice. Duration of accreditation is three (3) years.
 - **Two year** - An overall score of at least 90% was achieved, but a score of less than 85% was identified in at least one performance area (i.e., pre-inspection questionnaire, policies and procedures, executive director, medical director, technical personnel and procedures, lab and equipment, records) during the site inspection and upon initial review of the policies and procedures manual. Identified deficiencies did not involve potential threats to recipient or employee safety. Deficiencies can be corrected through submission of written progress reports and corrective actions within specified time frames. Duration of accreditation is two (2) years.
 - **One Year** - An overall score of at least 85% was achieved, but scores less than 85% were obtained in more than one performance area (i.e., pre-inspection questionnaire, policies and procedures, executive director, medical director, technical personnel and procedures, lab and equipment, records) during the site inspection and upon initial review of policies and procedures manual. It is expected that deficiencies can be corrected through submission of written progress reports and corrective actions within specified time frames. Identified deficiencies did not involve potential threats to recipient or employee safety. Duration of accreditation is one (1) year.
- b. The above are guidelines only. During the inspection team's presentation to the Accreditation Board and the ensuing discussion, the Board may consider other factors in determining accreditation status. These may include, but are not limited to:
 - Corrective actions submitted in the appropriate time frame prior to the meeting of the Accreditation Board (D1.400).
 - Patterns of deficiencies (i.e., over time or by type).
 - Discussion and review of inspectors' specific findings.
 - Repeat deficiencies (deficiencies found on prior inspections for which corrective actions had been submitted which are again found to be out of compliance with EBAA Medical Standards).

Eye Bank Association of America's Accreditation Status List

Current as of December 2009 – Public

Page 8 of 9

- c. All banks awarded accreditation, regardless of the length of their accreditation status, have been found by the Accreditation Board to be in substantial compliance with EBAA Medical Standards, with no evidence of donor screening or tissue procurement, processing, storage or distribution practices that represent a potential threat to recipients or employees.

D1.330 Non-Accreditation

A status of "unaccredited" will result when an eye bank has demonstrated significant noncompliance with EBAA Medical Standards, as in the following:

- a. Scheduled inspection results show:
 1. An overall score of lower than 85%, or
 2. Potential threats to recipient and employee safety, or
 3. Noncompliance identified at a prior site inspection that was purportedly corrected is again found during this site inspection, or
- b. The bank's accreditation is withdrawn by the EBAA for other actionable reasons such as:
 1. Failure to comply with required corrective actions following a site inspection
 2. Failure to handle 25 surgical tissues within one year, absent an approved correction plan
 3. Result of an off-cycle inspection
 4. The bank declines to be inspected upon expiration of accreditation
 5. Noncompliance with EBAA Medical Standards identified during an inspection is determined to require immediate action.
- c. The bank voluntarily withdraws from accreditation.

Summary Suspension

In rare cases, where an inspection team believes that an eye bank fails to meet EBAA Standards to such a degree that the potential harm to recipients and/or employees is significant and immediate, the inspectors may recommend that the eye bank's accreditation be summarily suspended during the period between the date of the on-site inspection and the date the Accreditation Board meets to make a formal decision on the eye bank's accreditation status. Recommendations for summary suspension must be made by both members of the inspection team. When such a recommendation is made, EBAA staff will immediately convene a meeting or telephone conference with the inspectors and a Subcommittee, as defined in B1.000 General, section Off-Cycle Subcommittee. The panel will discuss the matter with the inspection team and make a decision to summarily suspend, or not summarily suspend, the eye bank's accreditation status. A decision to summarily suspend must be unanimous, and such decisions are not subject to appeal. Eye bank's that are summarily suspended will be so notified, and will have their accreditation status listed as "suspended" until the full Accreditation Board meets at its next scheduled time. An eye bank that has had its accreditation summarily suspended may not hold itself out to the public or to any third party as having EBAA accreditation during the period of the suspension.

Targeted Off-Cycle Inspections:

A Targeted Off-cycle Inspection occurs when an Accreditation Board subcommittee determines conditions are met as outlined in Accreditation Policy C1.500, a, section 1 or 2. A limited inspection may be conducted, targeting only those areas in which the EBAA has received signed allegations of potential problems (C1.500a.1.), or areas related to the subject matter of adverse reaction reports (C1.500a.2.). An EBAA representative will contact the eye bank one (1) day in advance of the inspection, and will notify the eye bank director of the following:

- The time of the inspection,
- Any documents and/or records to be made available to the inspection team; and
- The personnel needed to be available for interview by the review team.

This list represents information on file regarding the accreditation status of eye banks as of December 2009. The eye banks are listed in alphabetical order by state and categorized by their accreditation designation. If a bank is non-accredited (Denied), it is listed as such with the date of denial. For further information, contact the EBAA office at 202-775-4999.

Eye Bank Association of America's Accreditation Status List

Current as of December 2009 – **Public**

Page 9 of 9

Other Location(s)

Eye banks applying for accreditation/reaccreditation which operate entities physically separate from the parent bank shall be required to complete the Other Location(s) section of the EBAA Site Inspection Application (see Accreditation Policies and Procedures C1.400, Inspection of Other Location(s) to Parent Banks).

F1.000 Identification of Accreditation Status

- a. An accredited eye bank may identify itself as such and hold itself out to the public as EBAA accredited. A bank accredited for limited functions must so designate itself in a manner that does not imply accreditation for full service.
- b. A non-accredited eye banks shall not hold itself out either expressly, or indirectly, as an EBAA accredited eye bank. All materials that identify its accreditation status must be submitted to the EBAA for approval prior to distribution.
- c. Eye banks provisionally accredited shall identify themselves as such.
